

## A Warm Welcome Part of the Treatment

First-time visitors to Dr. Robert F. McGuire & Associates often wonder when they enter our reception area—"Is this really the right place?"

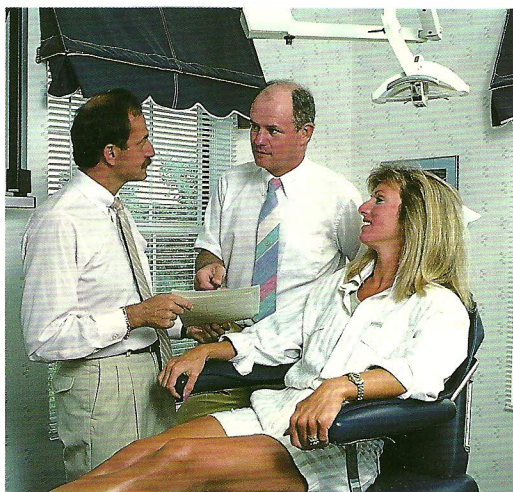

They see children having fun playing in the special areas we designed just for kids. Adults are relaxing on one of the comfortable sofas perhaps browsing through a magazine or sipping a cup of coffee. These people seem to have forgotten they are patients in a dentist's office! That is part of Dr. Robert F. McGuire & Associates special treatment.

We sincerely believe a visit to the dentist's office should be pleasant. Because if patients feel relaxed when they come for their dental visits, chances

are they will try and maintain a regular schedule for dental health. This is important in preventing the most common dental problems. The truth is, our teeth are meant to last as long as we do! By following a regular regimen of home and professional care, we significantly raise the odds of avoiding major oral health problems and keeping our teeth for life.

So we put a great deal of effort into creating a comfortable atmosphere. We know our patients appreciate the concern we have for their comfort... because most of our new patients are referred to us by our current ones.

Welcome
